

About the Golden Jubilee Foundation

- Four distinct parts – a hospital, a research institute, an innovation centre and a hotel.
- Foundation's 2020 vision is to lead Quality, Research and Innovation for the NHS in Scotland.
- Beacon of innovation in Scottish healthcare by introducing new ways of working.
- Approximately 1800 staff and over 100 volunteers and lay members.
- Top health and social care organisation in Stonewall Workplace Equality Index 2015
- Investor in Volunteer accreditation.
- Gold award – Healthy Working Lives.
- Mentally Healthy Workplace.
- Positive Engagement Score of 98%. Our unique reputation score by collating all interactions, reviews and feedback from Facebook, Google+, Twitter and Patient Opinion as well as emails and media coverage.

Golden Jubilee National Hospital

- Major centre for national and regional heart and lung services; fastest 'door to balloon' time for STEMI heart attacks, busiest lung centre in UK, and all cardiac surgery performed in under nine weeks.
- One of the largest elective orthopaedic centres in Europe, carrying out more than 25% of all hip and knee replacements for NHSScotland.
- Scotland's largest provider of cataract procedures, carrying out more than 15% of all activity.
- 94% of patients rated the Golden Jubilee between eight and 10 out of 10 in the most recent Inpatient Survey.

Golden Jubilee Research Institute

- Purpose-built research facility: consulting rooms, lab and dedicated research hub.
- Undertake ground-breaking research across all of our hospital specialties, including interventional cardiology, electrophysiology, pulmonary vascular disease, advanced heart failure, orthopaedics and anaesthetics.
- Pioneering stem cell therapy for patients having a STEMI heart attack.
- Lead NHS organisation for several national and international interventional cardiology research projects.
- Undertake Computer Assisted Hip Arthroplasty, which could increase accuracy by over 20%.
- Part of UK's first gene therapy trials for heart failure.
- Preventative angioplasty trial for heart attack patients proves putting stents in other narrowed arteries could save thousands of lives per year.

Golden Jubilee Innovation Centre

- Establishing philanthropic programme for NHSScotland.
- Focal point for driving forward innovation for NHSScotland.
- Working with industry, academia and NHS. Testing proof of concept for proactive fundraising.
- Purpose-built space to support and channel innovations.
- Unique Quality Framework and innovative mobile dashboard app.
- Pioneers of Medical Devices Alpha Test (MDαT), a unique review process which connects inventors, funders and clinicians.
- Responsible for the Health and Social Care Innovation Fund.

Golden Jubilee Conference Hotel

- Four-star residential training and conference venue.
- Supports the Foundation as a pivotal meeting and hospitality element of our internationally renowned innovation campus.
- Supports Golden Jubilee National Hospital by providing accommodation to assist with access for patients and their relatives from all over Scotland.
- Member of Conference Centre of Excellence and International Association of Conference Centres.
- State-of-the-art AV links to the hospital's theatres, Cath Labs and imaging suites.
- Top 10 UK hotel in the Simply the Guest Awards.
- TripAdvisor Hall of Fame.
- Investors in People Gold Award.
